Edmond OK 73034

Cell: (405) 602-9034 – bschwabe@cox.net

Summary

Creative Engineer trained in the full cycle of product design from concept to production and assembly. I have many years of experience across several disciplines. I have a passion for problem solving, thinking outside of the box. I like to explore new idea possibilities whenever and wherever I can. I am available for hire to work with you and find an efficient solution to your current or future design challenges.

Please see my current online resume for more information and details about me: [Resume-detail.pdf](#)

Also please see my reference letter from my previous employer: [Parallax Letter of Reference.jpg](#)

Reasons for each job change since 2000 including why I am seeking a new position at this time.

With a long time standing with Parallax as a customer since 1990, and actively being a member/contributor in their electronics forum (+22 years) , Leaving National Semiconductor, I joined the Parallax team in 2005 as Parallax was in need of an IC layout engineer. Joining Parallax allowed me the blessing to telecommute and work from home. This in turn allowed us to move back to Oklahoma, where my wife and I are originally from, so that our children would have the opportunity to know who their grandparents were and get to see them more often.

Recently Parallax had to let me go due to increased tooling costs and licensing renewals that were cost prohibitive to support IC layout design and keep me on board. (Please see reference letter above)
